Lean Ops at San Francisco Ballet: An Interview with Kim Ondreck Carim, CFO

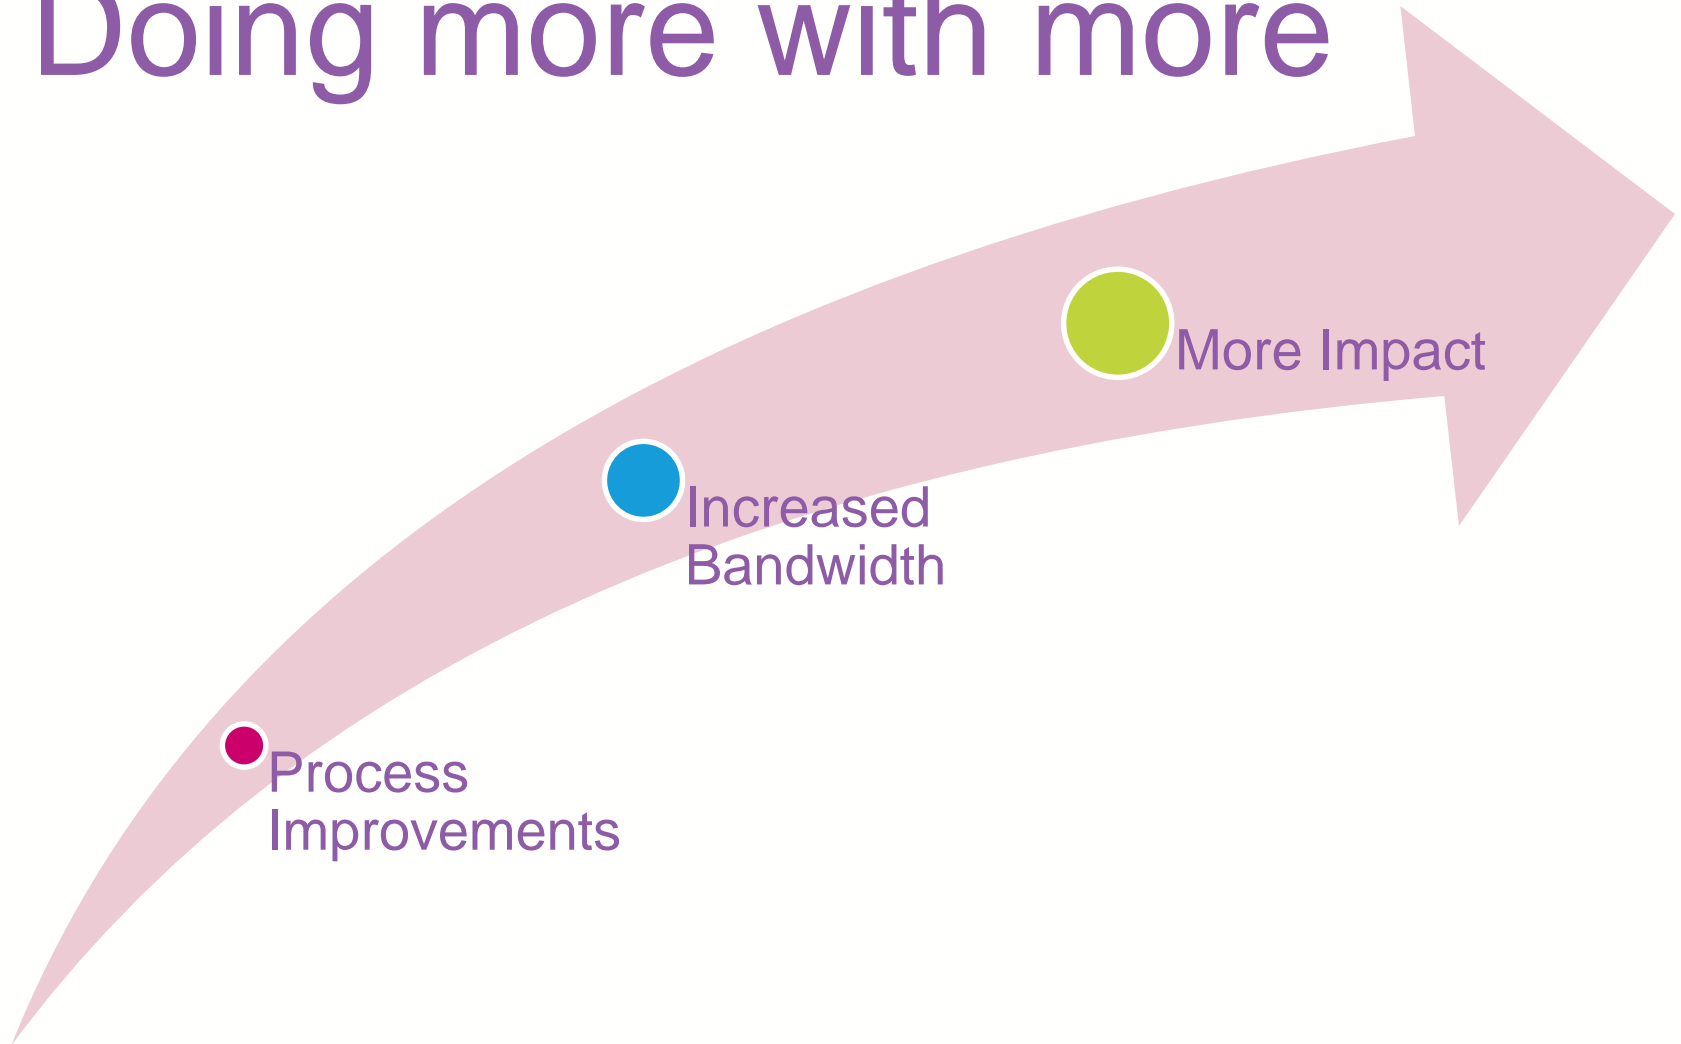

SAN FRANCISCO BALLEt
HELGI TOMASSON . ARTISTIC DIRECTOR

What is Lean Ops?

What is Lean Ops?

Lean Ops is the maniacal pursuit of the elimination of waste from every process with the ultimate goal of providing world-class quality, delivery, and service to the customer at the lowest possible cost.

Doing more with more

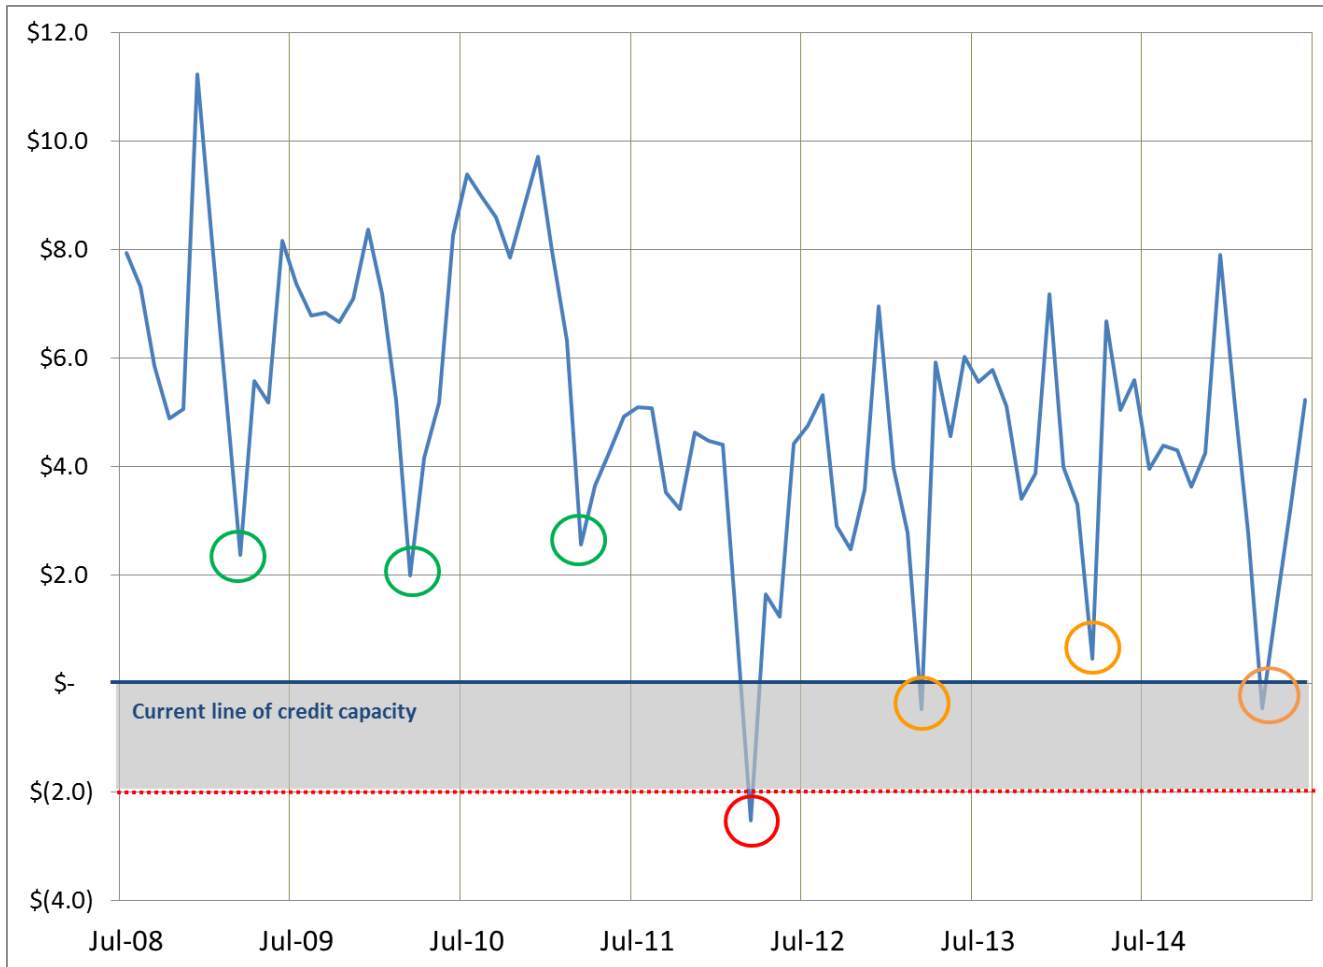

SAN FRANCISCO BALLEt
HELGI TOMASSON . ARTISTIC DIRECTOR

What was the impetus for bringing it to
San Francisco Ballet?

Cash Flow Trends

Strategic Alignment

1. Strengthens the organization's ability to execute by selecting only a vital few breakthrough objectives that will have a significant impact on the bottom line
2. Ensures the organization is aligned to support mission, vision, values, and to achieve breakthrough objectives
3. Builds lasting management buy-in and teamwork across the institution to foster a long-term commitment to organizational transformation, and increased flexibility

SAN FRANCISCO BALLEt
HELGI TOMASSON . ARTISTIC DIRECTOR

How is it positioned in the organization?

Can you walk us through the 4-part vision for lean ops at SF Ballet?

Lean Ops Vision

1. The work that every one of us does is adding value somehow to the organization, in support of the Ballet's mission, at every step along the way.

- *We eliminate time-wasters (the things that are non-value adding) as much as possible in our work processes.*

Lean Ops Vision

2. We use our critical thinking and creative abilities where they will have the most impact.

- *We complete our mundane tasks as simply and efficiently as possible, with few errors and less re-work. This allows us to undertake our more complex processes thoughtfully and carefully. We have resources and documentation to support the staff in these areas.*

Lean Ops Vision

3. All staff members are engaged with Lean Ops.

- *Staff understand Lean Ops and participate in Lean Ops efforts. Lean Ops becomes a habit, not something that takes effort. Staff are empowered to initiate positive change.*

Lean Ops Vision

4. With everyone thinking lean in large and small ways, over time we will reach our savings goal of \$2 million.

- *We'll know what Process Improvement Events to hold for bigger wins.*
- *We'll waste less time re-inventing the wheel or fixing mistakes.*
- *We'll be using our time only on adding value to the organization and its constituents*

SAN FRANCISCO BALLEt
HELGI TOMASSON . ARTISTIC DIRECTOR

Please walk us through the Photo Approval Process Improvement as a way for us to learn how this works.

Facilitator

Priorities for Process Improvements

“Kaizen” = change (“kai”) for good (“zen”)

Process Step Type	Priority for Review	Required Action
Unnecessary non-value add	1	Eliminate
Necessary non-value add	2	Reduce
Value adding	3	Optimize

Process Improvement Agenda

1. Agree on Objectives and Propose Metrics
2. Agree on Scope of Process: Start and End
3. Define “Customers” and Value-Added Expectations
4. Map Current State
5. Brainstorm Improvements
6. Map Ideal Future State
7. Assess Gaps
8. Create Action Plan and New Process Metrics

Process Improvement Objectives

- Reduce the time it takes to obtain photo approvals (cycle time and lead time)
- Eliminate/minimize non-value-add activity, specifically waiting time
- Improve quality of images in the process
- Reduce/simplify the # of interactions
- Reduce personality-based exceptions
- Metrics
 - Volume (# of images supplied)
 - Number of exceptions
 - Cycle time (amount of actual work)
 - Lead time (cycle time plus queue time)
- Standardized work for photo approvals

Scope for Process

Start: Official AGMA or student images shot

End: Final approved images tagged in Fotoware as approved.

Out of Scope:

Plan for shots needed

Photo shoots scheduled

Images shot

Photos organized, tagged and ready to use

Event photos

Photo Approval Customers

And their expectations for added value from the process

Customers	Expected Value Add
Erik Almlie	Pre-selection of good images; basic color correction; photographer approves image for use
Dancers	Initial thoughtful and critical review by Artistic; especially for shots they are in but do not approve (3 or more dancers)
Media/Press	Timely images (ASAP); images represent current state of events on stage; quality; variety; needs addressed quickly
Marketing Department/ Advertising	Newest images are approved ASAP; images meet size/layout needs; speed of approvals; wide variety to choose from (not piecemeal approvals)
Helgi and Patrick	Quality images; brand representation; accurate depictions; easy access to approvals library; pre-selection for ease of approval
Choreographers	Input on how ballet is represented in images
Social Media (Carly and Katelyn)	New images; very old images (deep archives); images all the time; images as fast as possible
Development, Board, Volunteers	Available images approved in a timely manner

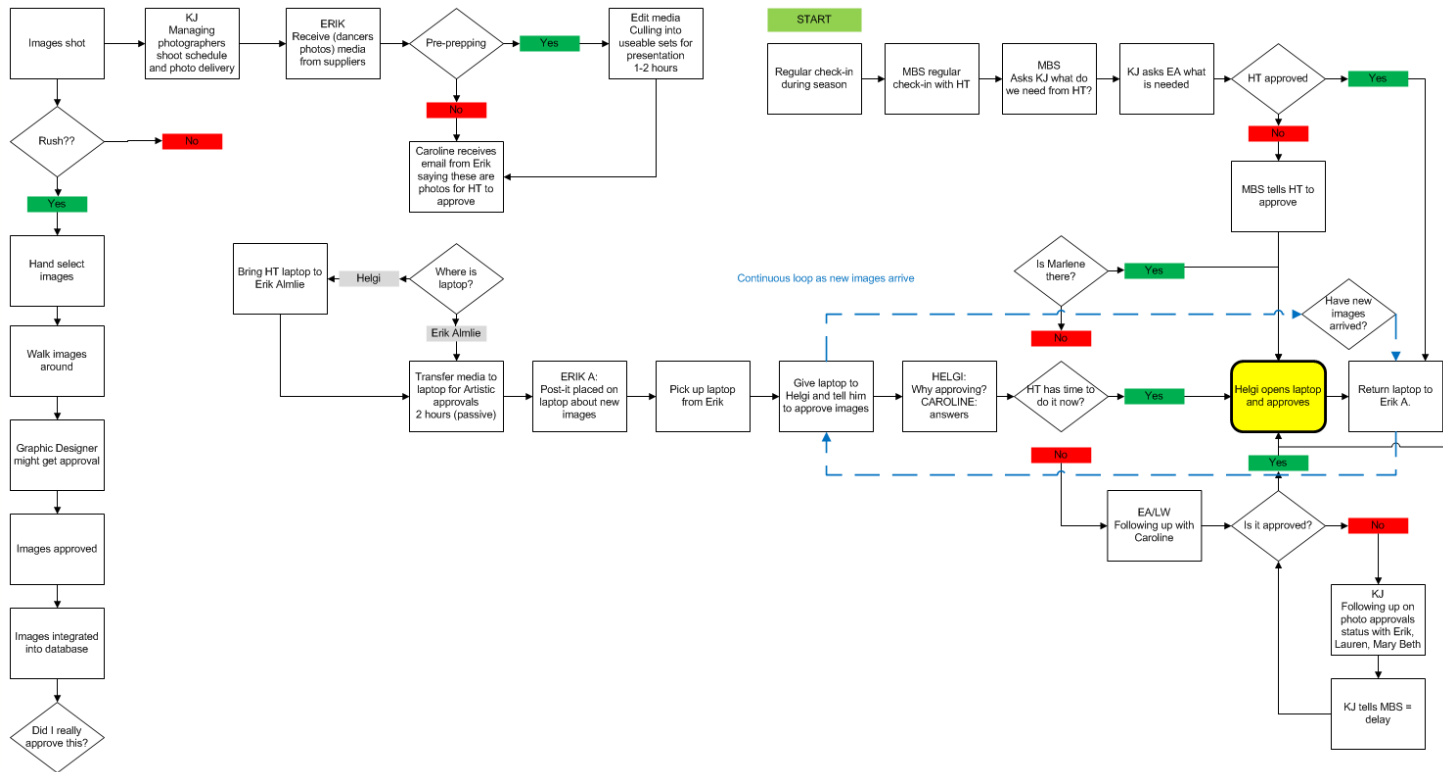

Current State

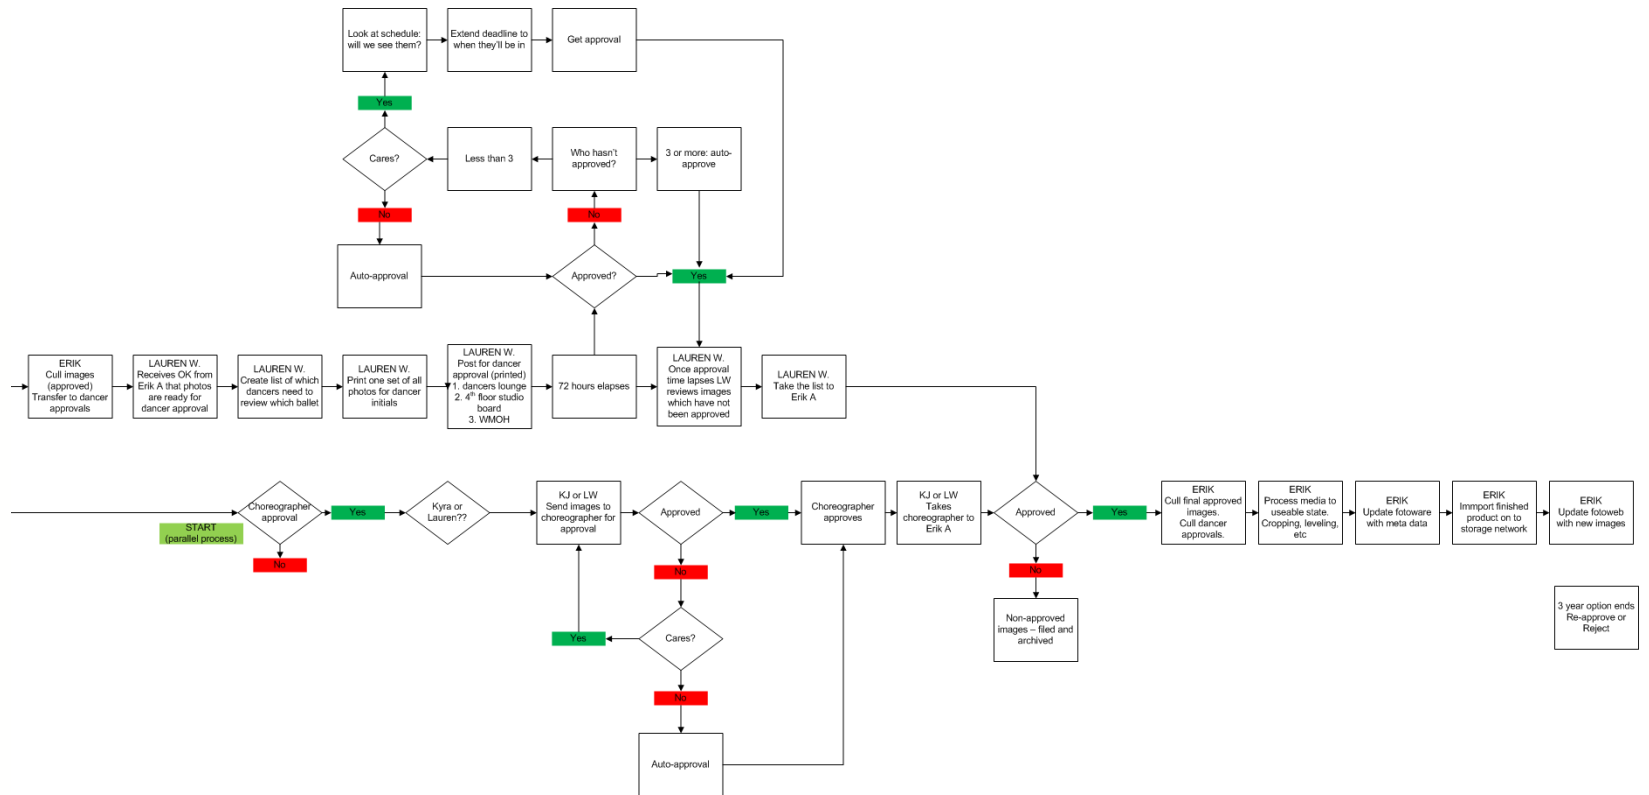

Process Mapping = Flowchart

Start...

End.

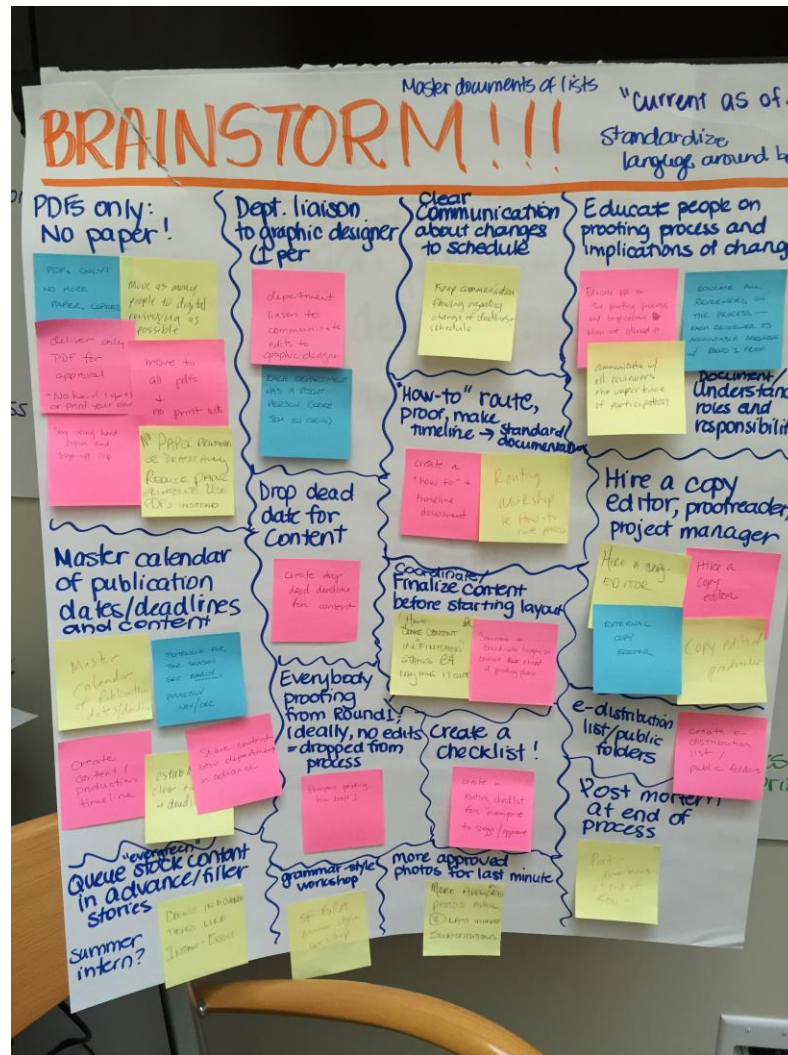

Calculating Cycle and Lead Times

The team at work:

Improvement Brainstorm

Brainstorm Ideas for Improvement

Purchase and Implement Fotoware Enterprise

Reduce # of people involved

No exceptions to Dancer 72-hour approval window

Choreographers must approve photos before leaving the building

Photographers reduce the number of images supplied

Assign and train archive power users in each department that uses images

Understanding of sense of urgency by approvers

Direct access to images to be approved via network (i.e., no laptop)

Photo approval station outside the 4th floor studios

No paper approvals

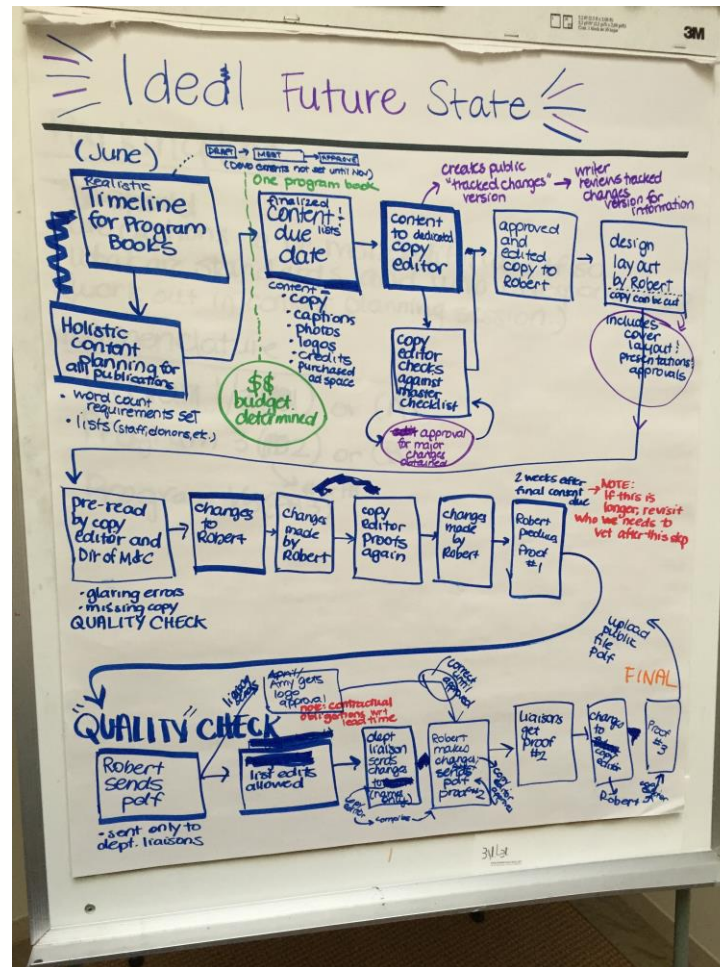

Plan for appropriate and required marketing imagery in advance

Keys to the Future State

Results of the Gap Analysis

- Reduce the volume of images entering the process
- Document and enforce clear and reasonable expectations for approval turn-around times
- Make it physically easier to approve the photos
- Reduce the number of people ensuring images are moving through the process

Ideal State Process Map

Key Action Items

- Create technical specifications for images that photographers must ensure all images meet before turning them over to SFB (Erik A./Kyra)
- Establish a procedure for obtaining Choreographer opt-in to photo approvals and for scheduling an approval session prior to departure (Caroline)
- Schedule approval session for Artistic Director at least once every two weeks for an hour, involving Marlene when possible (Caroline)
- Calendar two week periods for Artistic approvals and communicate between the departments when deadline is approaching; images not reviewed will be considered approved after a review cycle has expired (Erik A. and Caroline)
- Strict adherence to Dancer 72-hour approval window (Lauren/Kyra)
- Supply images to be approved on a networked computer for Artistic Director and Associate Director of the School, eliminating the need to pass a laptop back and forth (Murray)
- Create a photo improvement station outside 4th Floor studios
- Purchase, implement and train on Fotoware Enterprise (Murray)

Key Metrics

To be measured now and as action items are accomplished:

- Number of photos received from photographers
 - Goal: Decrease # by 50% from current state
- Numbers of photos received from photographers not meeting technical requirements
 - Goal: Decrease to zero
- Number of photos not reviewed by Artistic/Artistic Director within two week window
 - Goal: Decrease to zero
- Number of exceptions made to dancer 72-hour approval period
 - Goal: No exceptions
- Number of choreographer approvals required after departure
 - Goal: Decrease to zero

Measures of Improvement

From Current to Ideal Future State

	Current	Ideal Future	Improvement	% Improvement
Cycle Time	17-23 hours (2-3 days) + 72 hours	8-10 hours + 72 hours	9-13 hours	52% to 55%
Lead Time	44-49 working days (2+ months)	13-17 working days	31-32 days	65% to 72%
# of People in Process	6	4	2	33%

Continuous Process Improvement

Weekly Inspiration: Are You My Customer?

10/5/2015 5:32 PM Kim Ondreck Carim

The first tenet of Lean Operations is that all processes must focus on effectively delivering value to your customer. We know what a process is and we know value when we see it, but how to identify your customer?

When we look for "customers" in our internal processes, we don't mean the audience for ballet performances or donors or the global ballet community. In knowledge work, we create information. The customer is the user of the information we create. The information created should create positive value for its user, whomever that may be in the organization.

Can you think of examples of information you create that goes nowhere? Or it goes to your customer, but your customer does not use the information in a timely manner? If you can think of these examples, you may be on to places of "waste" or "non-value-added" activities to eliminate. Be brave and ask your customer what value they are deriving from your information. Is there a way that information could be delivered only on a "pull" versus a "push" basis? ("Pull" means that you provide the information only when it is asked for; "Push" means you provide the information whether or not it is asked for.) Is there a way you can work together to reduce the effort in creating "sometimes used" information?

This week, be inspired to provide excellent value to your customer by asking him or her how they define value in the information that you provide to them.

Celebrating Continuous Improvement: Celina Mercer

📅 8/20/2015 7:34 AM 👤 Jennifer French Kovacevich

This week's spotlight is on Wellness Program Manager Celina Mercer, who wrote in her notes for the Task due 7/27/15:

"Ordering an MRI requires completing lots of small steps. To minimize any room for error, I spent my 15 minutes writing out a brief checklist of all the information and steps I need to obtain or complete whenever I need to schedule an MRI. I made it concise and small enough to hang by my phone for easy access!

This is important for me now because I am new. However, referring to this quick checklist each time I do this will ensure I am consistently correct and reduce the chances of me making a careless errors."

Though relatively new to the Ballet and the Lean Ops/Continuous Process Improvement initiative, Celina has really embraced the concepts and jumped right into process documentation. As she told me, "I'm a meticulous note-taker as is, but knowing the company was really involved in Lean Ops encouraged me to do more. I'm not just taking notes for myself now, I'm writing them down so I could have them for anyone else who might have to do this work."

Being a newcomer to her position, she has no shortage of ideas of processes to document. "As I learn things, I create instructions, create lists." She has a binder of such documents started by her predecessor, Michelle Zimmerman, and she continually revises them. "My checklists aren't static, that's the big thing, too." And she keeps a running list of Lean Ops ideas to do, especially for while the dancers are off on tour and she can focus on bigger projects. "There's always something I can think of that could be leaner."

This Week All Tasks Completed Find an item SAVE THE VIEW

Task Name	Due Date	Assigned To	Time Spent	What I Did
<input checked="" type="checkbox"/> Your 15 Minutes for the Week of 9/21/2015	Sunday	Ari Lipsky	30	I completed the task I started last week and organized my desk in an intuitive way so everything has its place and I will feel more at ease doing my job. Now, to decorate...
<input checked="" type="checkbox"/> Your 15 Minutes for the Week of 9/21/2015	Sunday	Caroline M. Giese	15	I continued to update and add to my contact list to make it easier to find people's information. No more searching for information in email signature lines!
<input checked="" type="checkbox"/> Your 15 Minutes for the Week of 9/21/2015	Sunday	Celina Mercer	20	After the annual screening on Tuesday, I wrote a quick debrief with Mike's help about what worked best and what could have been improved. I made this debrief into a set of tasks as well as planning timeline for next year.
<input checked="" type="checkbox"/> Your 15 Minutes for the Week of 9/21/2015	Sunday	Elizabeth Roddy	15	Created a Community Scholarship Program orientation check-list to help us remember each year what we need to prepare for the parent/student orientation at the beginning of the school year.
<input checked="" type="checkbox"/> Your 15 Minutes for the Week of 9/21/2015	Sunday	Eva Spillane	15	Took 15 Minutes to type up my process for the weekly check run. I also spoke with Natal during the weekly check-in about how we can make check cutting day more efficient so we can have a smoother check signing day.
<input checked="" type="checkbox"/> Your 15 Minutes for the Week of 9/21/2015	Sunday	Glenn McCoy	15	Bonnie and I spent 15 minutes discussing ways, using Sharepoint and/or Tessitura, to store and share information internally that will help us better manage our relationships with members of the Board of Trustees.
<input checked="" type="checkbox"/> Your 15 Minutes for the Week of 9/21/2015	Sunday	Ingrid Roman	15	Made edits to/updated Amy's Retail Partner Check List w/event planning info
<input type="checkbox"/> Your 15 Minutes for the Week of 9/21/2015	Sunday	James Hosking		
<input checked="" type="checkbox"/> Your 15 Minutes for the Week of 9/21/2015	Sunday	Jennifer Bakane	20	After learning the process this week, I created a how-to doc for entering tuition charge in education edge using groups of record.

SAN FRANCISCO BALLEt
HELGI TOMASSON . ARTISTIC DIRECTOR

Overall, what has the SF Ballet gained so far by implementing Lean Ops?

And, what do you anticipate from it in the next 2-3 years?

SAN FRANCISCO BALLET
HELGI TOMASSON . ARTISTIC DIRECTOR

What would be your advice to other leaders about how best to implement Lean Ops?

Can you share something you would do differently with the benefit of hindsight?
